SolanaDao

Solana's promoter in BSC

SolanaDao(SOLD) was established in January 2022 by Solana European Community Foundation, invested by famous European crypto investment institutions, and jointly sponsored by Solana communities in France, Germany, North America and Southeast Asia.

A stack of several gold coins, with the top coin prominently displaying a dollar sign. The coins are rendered with a metallic texture and are set against a dark blue background with vertical lines and glowing dots.

The goal is to stimulate BSC users' perception of Solana through marketing, promotion and airdrop, and then quickly realize BSC users' Solana million money holders plan.

Solana is a decentralized blockchain built to enable scalable, user-friendly apps for the world.

Solana's scalability ensures transactions remain less than \$0.01 for both developers and users.

Solana is all about speed, with 400 millisecond block times. And as hardware gets faster, so does the network.

The network will remain open for applications to run freely and transactions will never be stopped.

Solana Ecology has formed covering DeFi, ToolKits, Infrastructure, NFT, games, wallets, DApp.

Our proposed SolanaDao effectively helps Sonata to be popularized and matured in BSC. SolanaDao quickly absorbed 1 million coin-holding users from BSC users by paying dividends to SOLD holders. 10% handling fee for each transaction, all of which will be used for token dividends. Huge dividends are more conducive to the promotion of SolanaDao community, spreading Solana's public chain technology and values.

Tokenomic

Token economics promotes SolanaDan

Smart Network: BSC

Total Supply: 1 Billion

Burn: 500 Million

Presale and Poll 360 Million

50 Million for Cross-Chain

50 Million for Application

20 Million 2% Marketing for Airdrop

20 Million 2% for Exchange

The development of SolanaDao is based on Solana. SolanaDao is subject to a 10% tax on both sales and purchases. Holders of SolanaDao will continue to receive Solana dividends from the purchase tax. The sales tax will be used to buy back and destroy SOLDAO, and increase the value of SOLDAO.

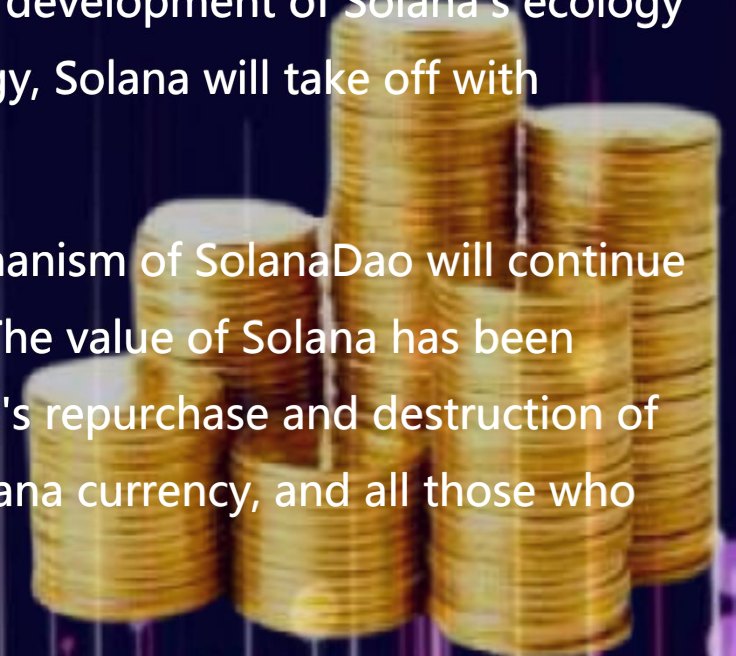

Buy Slippery: 10% for Solana Dividends
Sell Slippery: 10% for Marketing

The price of Solana tokens has increased by more than one hundred times. But each Solana is close to 100u, and its value still has a lot of imagination. Obviously, with the development of Solana's ecology and the maturity of its technology, Solana will take off with SolanaDao.

The repurchase and destruction mechanism of SolanaDao will continue to raise the currency price of Solana. The value of Solana has been recognized by the market. SolanaDao's repurchase and destruction of Solana will both raise the price of Solana currency, and all those who enjoy dividends will benefit.

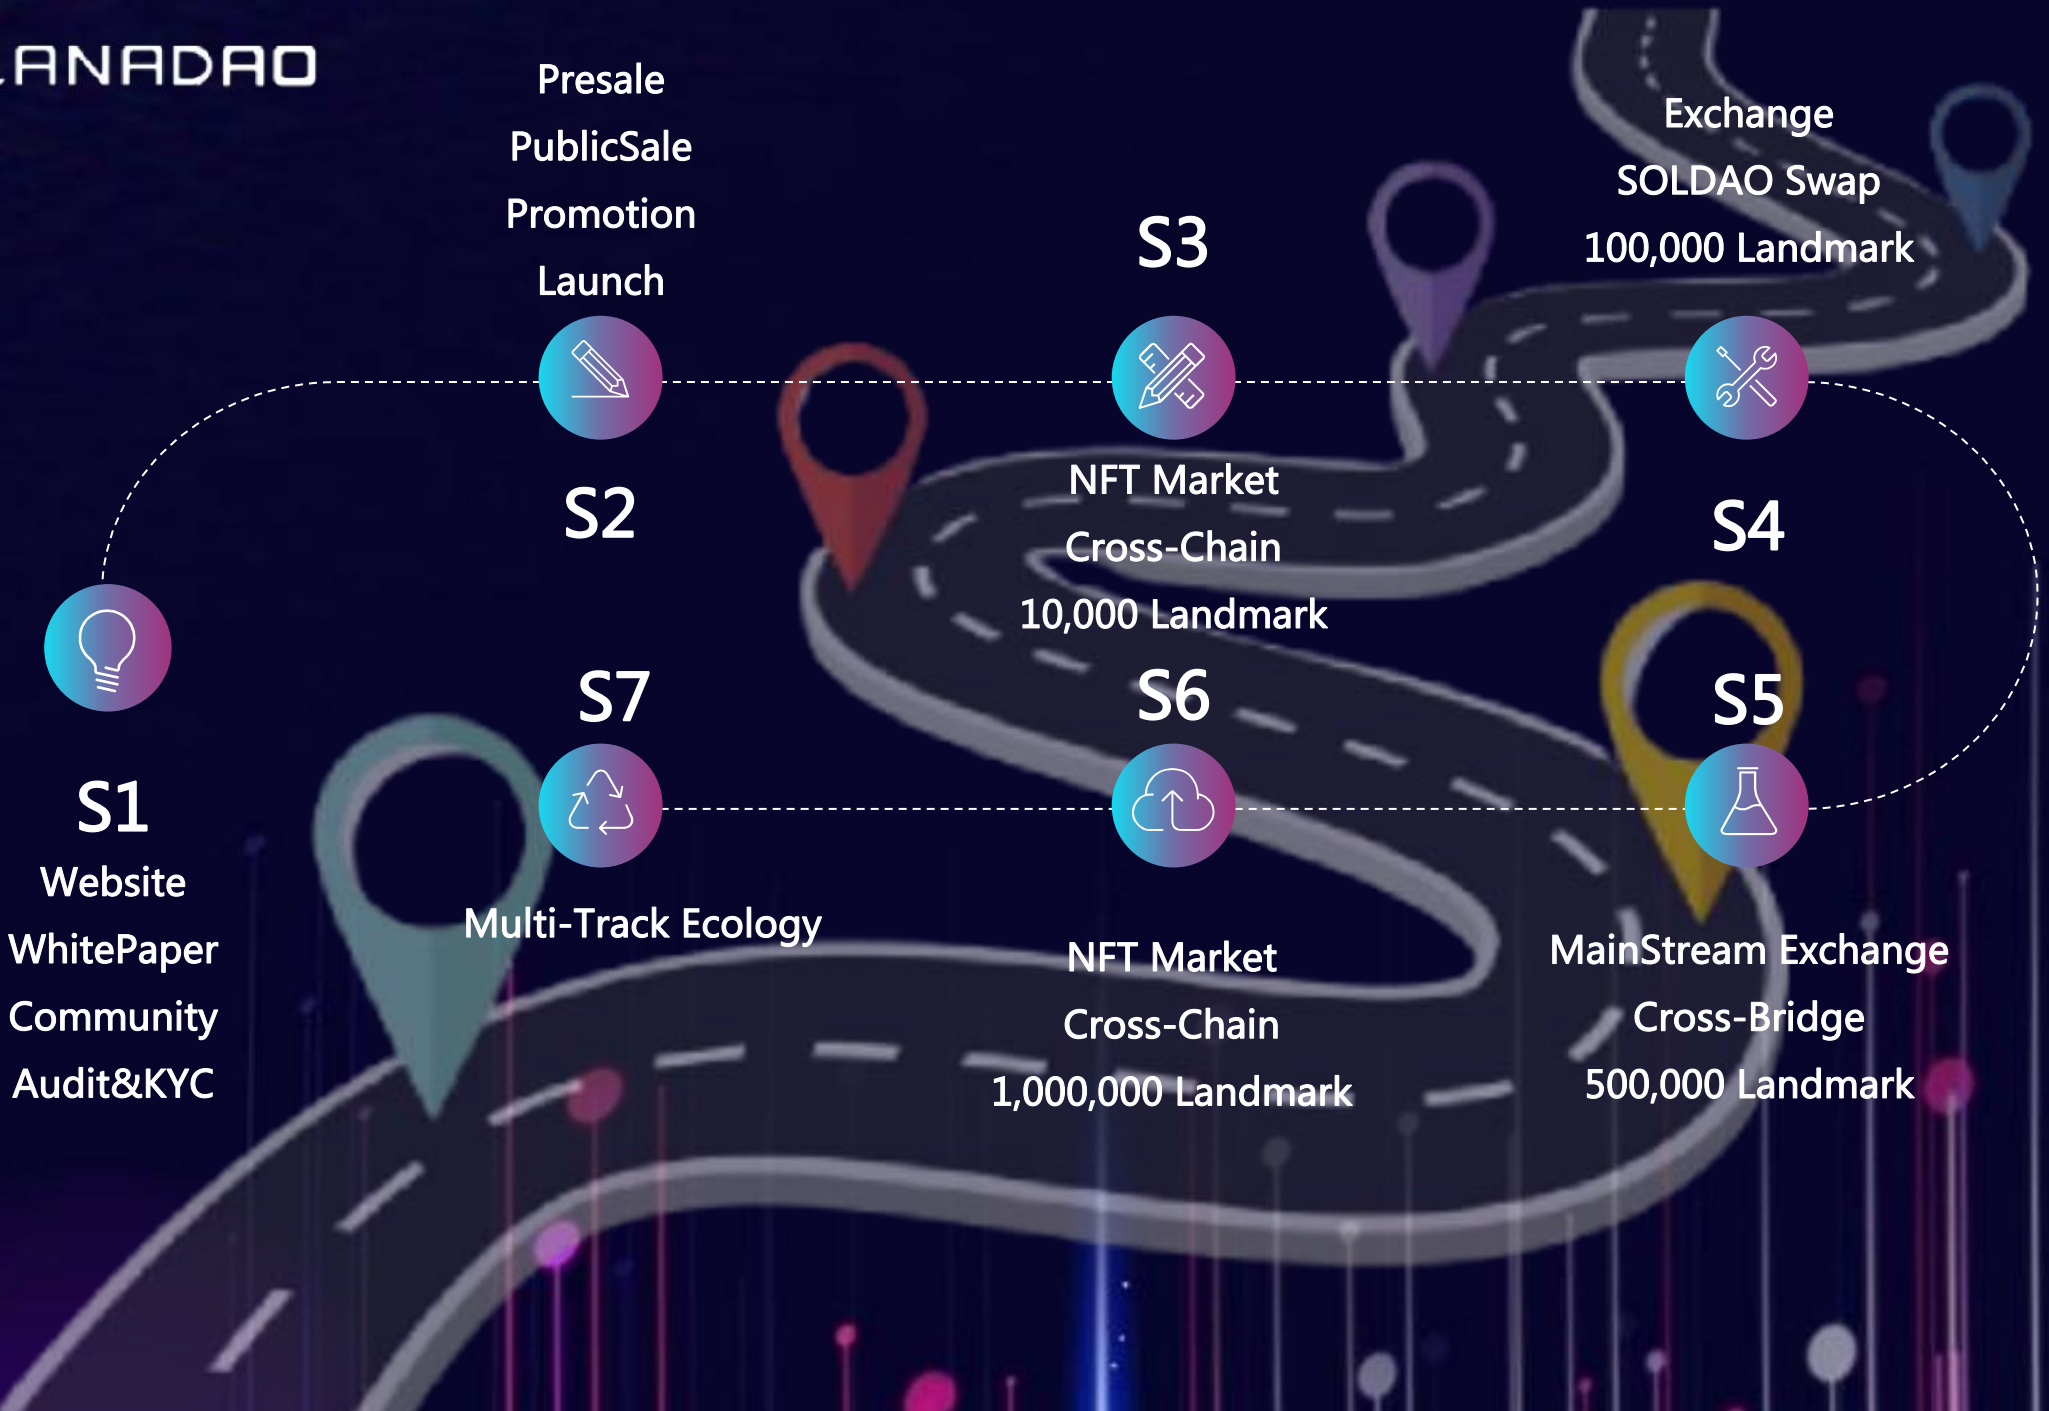

Million Launch

One million holders promote Solana Ecology

SolanaDao's goal is to realize BSC's millions of money holders, so that more people can get dividends and realize the value of Solana. Solana European Community Foundation plans to develop cross-chain bridge, flash platform, SolanaDao Swap, NFT market, pledge platform and games to build a complete token ecosystem. It will be launched on the mainstream exchange in the later period.

Multi-Track Ecology

Multi-track ecology promotes each other

Cross-Chain App

Cross-chain application will deepen the connection between Solana and SOLDAO, and divert BSC users to Solana.

Repurch Tokens

Repurchase of tokens can raise the price of Solana currency and accelerate the development and growth of Solana.

Burn Tokens

Burning tokens can raise the currency price of Solana on BSC and promote the development of SOLDAO.

Dividend Tokens

Dividends can enable more users to participate in Solana and promote the growth of Solana.

SWAP

SOLDAO Swap is a simple way to trade one Solana token for another via automated liquidity pools. Swap any crypto tokens, and you will get Solana rewards on every trade.

Cross-Chain

Solana cross-chain mechanism can make more users in other chains attracted by the excellent performance of Solana. Defi, Swap, applications can be in different chains and different scenarios.

More Cooperation

Stay tuned.

The purpose of SolanaDao based on BSC is to accelerate the development and growth of Solana.

The huge user base of BSC is the potential user market of Solana. SOLDAO can effectively guide BSC users to know and be familiar with Solana and migrate to Solana.

Need BSC killer application. The Solana currency price of BSC influences the development of Solana. SOLDAO's repurchase and destruction mechanism can increase the price of Solana currency.

SolanaDao is a key bridge, which realizes the benign interaction and complementary advantages of bsc and Solana ecology. User migration and application sharing across chains are smoother and more efficient.

Stay Tuned

Grow up with SolanaDao.
Witness the growth of Solana.
